Around the Campfire

Reading: Point of View

We continued to discuss how characters in stories feel and what their perspective is. This module will continue to have students look at the different characters and details to determine the point of view.

Writing: Informational

Students peer edited and self-revised their rough drafts this week. They will type and edit their typed drafts next week. Our goal is to finish towards the end of the week or beginning of the following week.

Math: Area & Perimeter

We switched gears and started working with both area and perimeter and their relationship. Students seem to understand area and perimeter alone, but when you put them together, it becomes a tad confusing. We will continue to work through this.

Science/Social Studies:

Weather

We will begin discussing the water cycle and weather in science. This will connect well with the content we will be reading in ReadyGen in the upcoming weeks.

ACTIVITIES

February 24- Spring Photo Day

February 27- Parent/Teacher Conferences

March 4- Early Release @ 12:50pm

March 5- Battle of the Books

March 6- Outdoor Campus Field Trip

NOTES

Star of the Week: Congratulations to the most recent student of the week, **Hattie**. Thank you for being a role model to the class!

Parent/Teacher Conferences- The spring conferences are scheduled Thursday, February 27. Please DOJO if you would like a conference- I still have some open slots.

Freckle Math: The school has been piloting a math program, and we started testing it out this week in the classroom. The students seem to enjoy the program and I find it helpful with their skills, so I thought it would be good if they wanted to practice at home. The log-in information is: www.freckle.com. They will log in as students, and the code is: 83TT8M

From The Teacher:

What a quick week! We had several students out sick this week, so keep students rested and healthy. I have been impressed by the students' eagerness to learn. I am hoping it can continue. It is hard to believe that February is almost over. March will be full of lots of new information and higher expectations. Students have been stepping up as readers and mathematicians and continually impress me with their learned skills every day. They are a good group of students, and I appreciate their uniqueness! Have a great weekend! 😊 Mrs. Anderson

Please feel free to call, send DOJO message, or e-mail me any questions or concerns about your child. Thank you!
